Before Starting The Game

When using the Virtual Boy, several adjustments must be made before starting the game. For your health and safety, be certain to perform these adjustments each time you play. If you wear glasses or contact lenses, be sure to wear them while using the Virtual Boy.

Insert the Game Pak into the Virtual Boy, then turn the POWER switch located on the front of the controller to the ON position.

When the screen pictured to the right appears, continue with the IPD and FOCUS adjustments.

Press the START button to display the "IPD" and FOCUS adjustment screen.*

Both adjustments are made using this screen.

■ IPD Adjustment

This adjustment sets Virtual Boy to the distance between your eyes (the Inter Pupil Distance).

While looking at the adjustment screen, turn the IPD dial located on top of the Virtual Boy until you can see a mark in all four corners of the screen, as shown on the screen to the right.

The best adjustment may allow you to see only three marks, or four slightly blurred marks. When you have completed the IPD adjustment, proceed with the FOCUS adjustment.

■ Focus Adjustment

This adjustment makes sure ~~that~~ you see the game image in the Virtual Boy display ~~clearly~~.

Move the FOCUS ~~slider~~ to the ~~CENTER~~ POSITION ~~as~~ marked on the housing.
For most people, the center position should give you the clearest image. If the ~~image~~ is still fuzzy, then adjust the FOCUS slider right or left until the image is sharp and ~~clear~~.

■ Automatic Pause Function

All Virtual Boy Game Paks contain an automatic pause function.

After completing the IPD and FOCUS adjustments, press the START button and the screen pictured at right will appear. The automatic pause is preset to the ON position. Nintendo recommends that you ALWAYS set the automatic pause to ON.

To override the setting, use ● or ● on the UTM-Control Pad, then press the START button to begin the game.

After continuously playing 'Mario Clash' for 15 minutes (or after each level is completed), the game will automatically pause. Please take a break and give your eyes some rest.

After your rest is completed, press the START button to restart the game.

Knock Off The Enemies By Throwing Shells!

The Clash House Tower has been invaded by bad guys! It's up to Mario to clear them out, throwing Koopa shells to knock them away. Take care as you battle in dangerous rooms of narrow ledges connected by pipes.

Enemy Characters

Koopa

If you jump on a Koopa, it will withdraw into its shell. You can throw the shell after picking it up. Koopas are the only thing you can jump on and throw. But after a short time, they will revive, so be careful!

Spike

If you throw a shell at him, you can knock him off. He is the weakest of your enemies.

Thorny

Thorny is protected by his three thorns. He cannot be knocked down with one hit.

Para-Goomba

This enemy jumps, making it hard to hit with a shell, so aim well.

Lobb

They will throw Iron Balls at Mario, so watch out!

Sidestepper

His scissor claws will block a thrown shell.
His only weakness is to hit him in the stomach.

Big Boo

She floats in the air and is hard to hit.
When Big Boo becomes transparent, she cannot be hit.
A shell will simply pass through without damaging her.

Snake

She multiplies by producing eggs.
Watch out for treasure.

Pokey

He shrinks if you hit his body with a shell.
His weak point is his head.

Along with the enemies, there are other hazards that will interfere with you.

Fire

It appears suddenly.
Be quick to avoid it.

Ice

It appears in the frozen room.

Important Point!

*When your score reaches 50,000 points, 100,000 points...
Your remaining Marios will increase by one.
Take aim and set your sights on a high score.
Good Luck!*
